

Parkinson winders satisfy the demands of the, *um*, most demanding.

Go ahead. Scrutinize us. And take a long hard look at our winders. In short order, you'll appreciate the benefits of working with a company that's literally hands-on. Unlike our competitors, Parkinson designs, manufactures, assembles, and tests each and every winder right here at Parkinson. The insights gained from this approach enable us to deliver winders that represent everything you want and precisely what you need (not to mention fitting comfortably within your budget).

At the end of the line, the last thing you need is a surprise. Make the call to Parkinson and know what peace of mind is all about. Call us at (401) 762-2100 and let us in on your challenge.

THE BOOK ON PARKINSON. Parkinson Technologies and its associated brands – Parkinson Winders, Marshall & Williams Plastics, and Key Filters – offer its customers leading-edge technology, time-tested equipment and real-time innovation in a wide variety of arenas. The technologies represented in our brands ensure that our customers remain productive, profitable and comfortably ahead of their competition.
